EDUCATION

Memorial University of Newfoundland

Joint Bachelor of Science in Computer Science and Physics

Expected Graduation: April 2026

St. John's, NL

Relevant Coursework: *Data Visualization (COMP 4304); Intro to Data Mining (COMP 3401); Intro to Machine Learning (COMP 3202); Algorithmic Techniques for AI (COMP 3200); Data Structures & Algorithms (COMP 2002), Object-Oriented Programming and Human-Computer Interaction (COMP 2001); Stats for Science Students (STAT 2550)*

PROJECTS AND EXTRACURRICULARS

RPMC 2025–2026 Quant Portfolio System

Nov 2025 – Present

Rotman Portfolio Management Competition

St. John's, NL

- Designed research and backtesting pipeline in Python (pandas, NumPy, yfinance/Stooq) to test stock/ETF signals (momentum, mean reversion, factor screens), enabling consistent comparison via Sharpe, max drawdown, and turnover.
- Leveraged vectorbt/Backtrader, scikit-learn, PyPortfolioOpt, Matplotlib/Plotly, SQL and Git to build portfolio risk/positioning logic (position & cash limits, volatility targets, exposure checks) and auto-generate equity curve, rolling Sharpe, and attribution reports for RPMC decisions.

Strategy Backtesting

Sep 2025 – Dec 2025

MUN Quant Society Data & Infrastructure Team

St. John's, NL

- Extended a Python backtesting engine (pandas, NumPy) to simulate trading strategies on historical data, producing comparable metrics (returns, volatility, Sharpe, max drawdown) for MQS research.
- Refactored signal, position-sizing and P&L components with realistic transaction-cost and risk-constraint modelling, making new strategies easy to plug in using shared data pipelines, Matplotlib visualizations, and SQL storage.

Sentiment Bot

Sep 2025 – Nov 2025

MUN Quant Society Data & Infrastructure Team

St. John's, NL

- Contributed to a Python NLP pipeline using web APIs, pandas and text-cleaning steps to ingest finance news/social posts and convert them into per-ticker daily sentiment scores for quant models.
- Integrated pandas, SQL databases and time-series storage (version-controlled with Git) to log sentiment alongside price data, enabling fast joins, visualization and backtests across multiple tickers.

PROFESSIONAL EXPERIENCE

Let's Go Connections

May 2023 – July 2023

Sales and Marketing Representative (Brand Ambassador)

St. John's, NL

- Ran in-person promotional campaigns, approaching potential customers and explaining client products/services.
- Answered questions, handled objections, and encouraged sign-ups while representing the brand professionally.

SKILLS & INTERESTS

Programming Languages: Python, Java, JavaScript, HTML, CSS, SQL, Node.js, React.js | **Data & ML:** pandas, NumPy, scikit-learn, PyPortfolioOpt, vectorbt/Backtrader, yfinance, Stooq, Matplotlib, Plotly, basic NLP (sentiment analysis) |

Tools & Platforms: Git, GitHub, Jupyter Notebook, SQL databases, Linux, Windows, MacOS, Microsoft Office | **Creative & Media:** Adobe Photoshop, Adobe Illustrator, video & sound editing.

Interests: Science | Computer Science | Physics | Technology | Sports | Soccer | Learning German
